

## The Kansas Historical Quarterly, Vol. 11 (Classic Reprint)

Excerpt from The Kansas Historical Quarterly, Vol. 11 The bluestem-pasture region of Kansas has come to be recognized as a natural region with rather clearly defined boundaries. On the map it appears as a somewhat elongated oval-shaped area about 200 miles from tip to tip, with Pottawatomie county, Kansas, at the northern end and Osage county, Oklahoma, at the southern end, the intervening country being some fifty miles, or somewhat more than two counties, in width. Roughly, this is the central third of the eastern half of the state, between 96 and 97 west longitude and 36 30 and 39 30 north latitude. The average annual rainfall varies from 30 to 35 inches except in the southern portion, but there the higher precipitation is offset, in part at least, by the higher temperatures and longer period of frost-free days - 186 or more annually in the southern tier of Kansas counties, as against about 178 days in the central and northern sections. Topographically the region is rolling to hilly, with rather narrow valleys, but the most characteristic features of the typical pasture portions are hills, or bluffs, formed by outcroppings of rock of the Permian and Pennsylvania strata. For the most part this rock is limestone, but in places, especially in the southern end, there is sandstone. The soil is of the residual type derived from the limestones, shales, and sandstones. In the typical limestone area outcroppings of stone appear near the top of the hills, the weathering process washing the decomposed materials down their sides to the lower ground. Bluestem is the dominant native grass, represented by two major varieties: the Big Bluestem (*Andropogon furcatus*) which thrives in the lower lands, and the Little Bluestem (*Andropogon scoparius*) found on the high uplands. These are tall grasses, as contrasted with the short grasses, the buffalo and the grammas, which are present in greater or lesser numbers according to

location and season, invading the region from the western side. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
