

Hypertext: Websters Facts and Phrases

The entries cover all parts of speech (noun, verb, adverb or adjective usage) as well as use in modern slang, pop culture, social sciences (linguistics, history, geography, economics, sociology, political science), business, computer science, literature, law, medicine, psychology, mathematics, chemistry, physics, biology and other physical sciences. This "data dump" results in many unexpected examples for hypertext, since the editorial decision to include or exclude terms is purely a linguistic process. The resulting entries are used under license or with permission, used under "fair use" conditions, used in agreement with the original authors, or are in the public domain. Proceeds from this book are used to expand the content and coverage of Webster's Online Dictionary (www.websters-online-dictionary.org).
